

INGRAM^{MICRO} CLOUD

**BUILD MORE
VALUE FOR YOUR
BUSINESS BY
OPTIMIZING YOUR
INFRASTRUCTURE
OFFERINGS.**

As customers continue to look to cloud in search of efficiencies and innovation, they are shifting towards everything-as-a-service models. They are searching for solutions that allow them to become operationally lean while increasing their innovation potential.

This presents an opportunity for your business to step in and deliver new forms of value – and a great first step is to start driving efficiencies within your infrastructure offerings.

- ▶ **Have you made significant investments when building and scaling your cloud infrastructure throughout the years?**
- ▶ **Have the investments you have made in response to increased customer demand for cloud caused your margins to shrink?**
- ▶ **Are you underutilizing your servers, only using certain capacity while still paying for what you don't use?**

HOW INGRAM MICRO CLOUD CAN HELP YOU.

With Ingram Micro Cloud, you can optimize your infrastructure, whether on-premises or in Azure, to make sure that you continue to reap the benefits of cloud infrastructure and earn higher margins while reducing costs.

We help you make the most out of the investments you have made with us, with the ultimate goal of enabling you to expand your solution portfolio to better serve the ever-changing needs of your customers.

OUR OPTIMIZATION PATH ALLOWS YOU TO:

Reduce your total cost of ownership (TCO).

Find efficiencies and maximize the value of your current infrastructure.

Free up budget to drive more innovation.
